INDIVIDUAL DESIGN / ZE-15

Off Grid Field Office

1-storey portable office / 160 sq ft enclosed

An 8 x 20 ft portable office with forest green heavy corrugated steel, rooftop solar panels, high protected windows, robust flat roof industrial cabin.

8' x 20'

160 SQ FT ENCLOSED / 1 STOREY

FLOOR PLANS + FOUR EXTERIOR VIEWS

GRID AND LOGIC

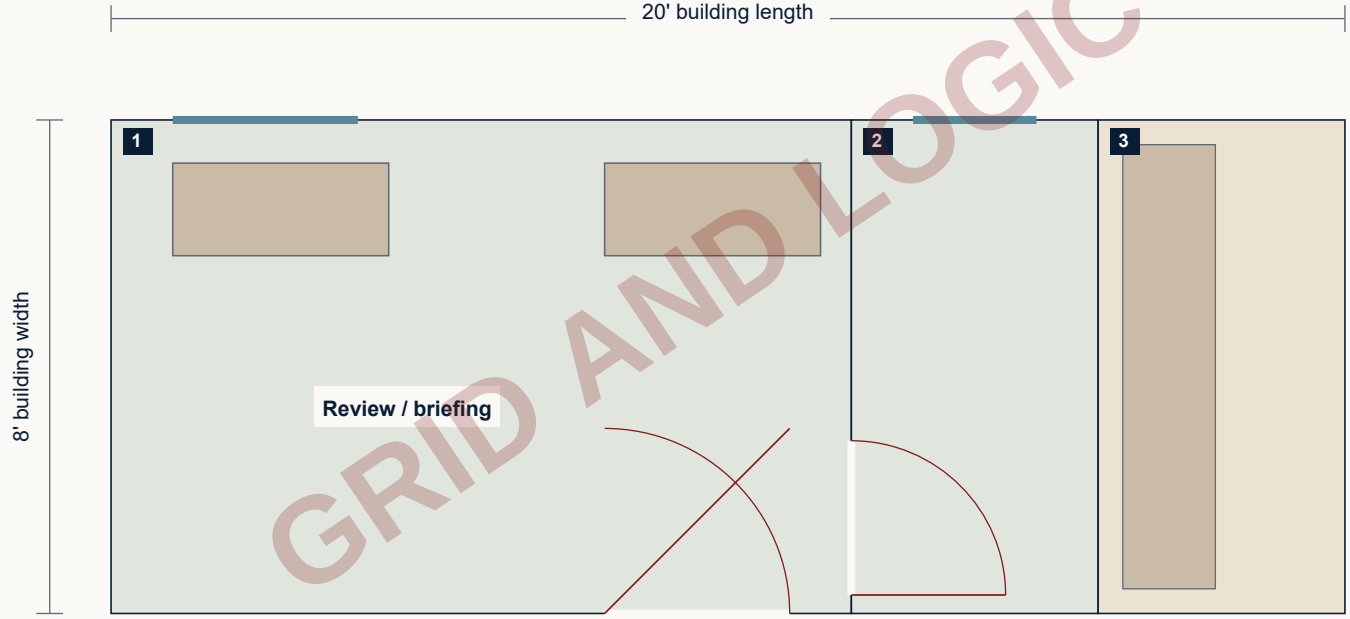

ORIGINAL EXTERIOR CONCEPT / CLIENT REFERENCE INSPIRED

ISLAMABAD / DESIGN COLLECTION 2026

01 / MEASURED SPACE

Ground floor. A distinct layout.

Nominal dimensions in feet. Floor-zone areas exclude wall deductions; furniture and openings are schematic.

GRID AND LOGIC

ZONE SCHEDULE / DIMENSIONS IN FEET

01 Review / briefing
12' x 8' / 96 sq ft

02 Comms / desk
4' x 8' / 32 sq ft

03 Equipment / pantry
4' x 8' / 32 sq ft

Blue: glazing / Red: indicative doors. Coordinate room access and opening positions in the detailed design.

02 / EXTERIOR DESIGN

The same design. Every side.

Four original visualizations illustrate this individual concept. Openings and construction details remain schematic.

GRUNDLOGIC

FRONT / ENTRY FACADE

20' nominal span / 1 enclosed storey

REAR / SERVICE FACADE

20' nominal span / 1 enclosed storey

FINISH DIRECTION: Forest green heavy corrugated steel, rooftop solar panels, high protected windows, robust flat roof industrial cabin.

Images depict a concept finish. Exact window locations, heights, stairs and roof assemblies are coordinated with the measured layout before fabrication.

02 / EXTERIOR DESIGN

The same design. Every side.

Four original visualizations illustrate this individual concept. Openings and construction details remain schematic.

GROUND LOGIC

LEFT / END VIEW

8' nominal span / 1 enclosed storey

RIGHT / END VIEW

8' nominal span / 1 enclosed storey

FINISH DIRECTION: Forest green heavy corrugated steel, rooftop solar panels, high protected windows, robust flat roof industrial cabin.

Images depict a concept finish. Exact window locations, heights, stairs and roof assemblies are coordinated with the measured layout before fabrication.

03 / MATERIALS & PROGRAMME

Details for this design.

A defined visual direction and spatial brief for the project quotation.

GRID AND LOGIC

Building	8 x 20 ft footprint; 1 enclosed storey(s); 0 bedroom(s).
Enclosed floor area	160 sq ft per floor / 160 sq ft total, before wall deductions.
Exterior palette	Forest green heavy corrugated steel, rooftop solar panels, high protected windows, robust flat roof industrial cabin.
Roof & outdoor space	Roof profile follows the exterior concept; structure and drainage to be designed.
Structure	Fabricated or joined steel modules; foundation, openings, connections and lifting points engineered for site conditions.
Comfort & finish	Insulated walls and roof; selected internal linings and floor finish; washable wet-area surfaces.
Glazing & doors	Opening schedule coordinated with rooms, privacy, escape and ventilation; safety glass and hardware specified individually.
Electrical & services	Power, lighting, sockets and data developed to suit use. Plumbing, water supply and drainage coordinated with available site services.
Circulation & access	Door swings and furniture are indicative; confirm finished clearances and accessible circulation.
Delivery & installation	Transport route, crane access, supports, anchoring and connections agreed before manufacture.

Concept proposal only. Final engineering, quantities, approvals and price are established for the selected design and site.

05 / MAKE IT YOURS

A clear plan for your next step.

Bring us your site and requirements. We will help develop the layout, scope, and quotation for your project.

GRID AND LOGIC

BEFORE WE DESIGN

01 Intended use and number of occupants

02 City, site access and available footprint

03 Preferred room layout and finish palette

04 Available power, water and drainage

05 Budget range and desired delivery timeline

LET'S BUILD YOUR SPACE.

REFERENCE & DESIGN NOTES

Architecture direction informed by client-assets references, then developed as an original concept. All measurements are nominal feet; wall thicknesses are not deducted. Wider modules require fabricated or joined frames. Original drawings in this catalogue are newly authored schematic interpretations, not reproductions of approved engineering drawings.
